

E. Infanta Rini Rayan

Senior Test Lead | Test Architect | QA Engineering Leader

Chennai, India

e.infantarini@gmail.com

+919941740532

Summary

Senior Test Lead and Quality Engineering Leader with 14+ years of experience defining and driving enterprise-level test architecture, quality governance, and automation strategy across complex digital programmes. Proven ability to establish quality gates, dashboards, and KPI frameworks that ensure consistent delivery excellence in SAFe and Agile environments. Hands-on expertise in designing scalable automation frameworks, integrating automated testing seamlessly into CI/CD pipelines, and leading cross-functional QA teams across multiple Agile Release Trains. Strong background in functional, regression, API, and non-functional testing with deep experience translating business needs into technical quality solutions. Certified PSM I (Scrum Master) and ISTQB Agile Tester Extension. Passionate about continuous improvement and shaping high-quality digital products for tomorrow.

Experience

Lead Quality Analyst / Test Lead

Tata Consultancy Services, Chennai

Sep 2019 — Mar 2026

- Defined and drove enterprise-level test architecture and quality governance standards across 3 Agile Release Trains (ARTs), leading a team of 8+ QA engineers and scaling the automation function from 2 to 6 engineers within 3 months to meet programme delivery demand.
- Created and maintained end-to-end test strategies covering functional, automation-first, and non-functional testing across 10+ programme-level releases; enforced quality gates that reduced post-release defect escapes by ~40% within 2 PIs.
- Participated in PI Planning across 6+ PIs; successfully committed and delivered 90%+ of planned test objectives on time with zero critical quality misses.
- Drove shift-left testing from sprint planning through requirements refinement, reducing late-stage defect injection by 35% and cutting average defect fix cost significantly.
- Designed and implemented a scalable, reusable, and maintainable automation framework using Selenium + Jenkins CI/CD, covering 70%+ of regression scope; integrated automated testing into the CI/CD pipeline to enable fast feedback cycles, reducing manual regression effort by 60% and defect leakage by 45%.
- Implemented quality dashboards and reporting mechanisms to provide visibility into product quality; maintained defect leakage below 3%, test coverage above 90%, and sprint velocity at 95% of planned capacity — presented to senior stakeholders quarterly.
- Facilitated Inspect & Adapt workshops and actively participated in architecture forums and design reviews to ensure testability and quality-by-design; process improvements reduced average defect resolution time by 25% sprint-on-sprint.
- Collaborated closely with DevOps, Scrum Masters, and Product Owners to integrate quality engineering practices into the continuous delivery pipeline; coordinated integration testing across 5+ dependent teams with 100% sign-off and no critical P1 production escapes.
- Validated REST API test cases using Postman across 3 major integrations, achieving 98% service contract accuracy and zero data integrity issues in production.
- Executed DB validation using MySQL across 10+ releases, ensuring 100% backend data accuracy and zero data-related production incidents during tenure.

Quality Analyst

Tata Consultancy Services, Chennai

Jul 2011 — Aug 2019

- Designed and executed comprehensive test plans, test cases, and test scripts for web and API-based applications across multiple projects.
- Performed Functional, Regression, Integration, and User Acceptance Testing (UAT), ensuring product quality against business requirements.
- Conducted API testing using Postman to validate service responses, data integrity, and integration points. Executed UI testing, DB validation in MySQL, and end-to-end regression test runs for each release.
- Managed defect lifecycle using Jira — raising, tracking, triaging, and driving resolution of defects in collaboration with developers.
- Prepared and maintained regression test suites in Jira for each release cycle.
- Collaborated with developers, business analysts, and product owners to clarify acceptance criteria and ensure testability.
- Participated actively in Scrum ceremonies: sprint planning, daily stand-ups, sprint reviews, and retrospectives.

Education

Master of Business Administration, Chennai, Mar 2009 — May 2011
M.O.P. Vaishnav College for Women

Bachelor of Information Technology, Chennai, Mar 2005 — Apr 2009
D.M.I. College of Engineering

Skills

- **Test Architecture & Strategy**
- **Agile / SAFe / Scrum**
- **API Testing (REST / SOAP)**
- **Automation Framework Design (Selenium)**
- **CI/CD Integration & Fast Feedback**
- **Defect Lifecycle (Jira)**
- **BDD / Shift-Left Testing**
- **Quality Dashboards & Governance**
- **SQL / DB Validation (MySQL)**
- **Cross-team Coordination**
- **Quality Governance & Standards**
- **Stakeholder Communication**
- **Methodology: Agile (Scrum, SAFe), Shift-Left Testing, BDD, Risk-Based Testing, Non-Functional Testing, Quality-by-Design**
- **Test Types: Functional, Regression, Integration, UAT, API, UI, DB Validation**
- **Automation: Selenium WebDriver, Automation Framework Design, Jenkins CI/CD**

Certifications and Licenses

Professional Scrum Master I (PSM I) — Scrum.org ISTQB Certified Tester Foundation Level — Agile Tester Extension
